## **INTRODUCTION**

I'm sure you've all heard of the famous PEPE in your lifetime. PEPE was originated in a 2005 online comic called Boy's Club. since then it has become one of the most famous memes throughout social media applications and cryptocurrency chat groups, everyone in the crypto space has heard about it!

We, the PEPE Solana team aim to bring you a top notch community based meme project on the Solana Blockchain. We are not just any regular meme coin, we are here to deliver top notch support to our community and continuously develop new ways for our community to prosper. Currently meme coins have little to no value in this space, but we are here to change the way meme works. We intend to incentivise creators and community members alike, with \$PEPE solana based assets and NFTs that will hold real utility in the space and bring value to the Solana blockchain. Cryptocurrencies have taken a big hit in the last couple years, people are losing hope, losing time, money etc. we intend to change that with \$PEPE.

## **Our Vision**

Our vision as a project has been to reward our users to the fullest and provide our community hope to make back some money that they have lost over the past while due to scammers, technological failures and of course poor personal decisions. We plan to create a platform which will allow a user to design, create and distribute their own NFT collections with the least amount of effort as possible and then view all NFT collections that have been created on this platform, including current floor prices, last sales, highest and lowest sales, freshly minted, oldest etc. a social platform is also in our agenda with functions that will allow users to earn \$PEPE and other future partner tokens while they share memes! With the community support, we don't see any reason that this can't be achieved in 2023 and have a top ranking project on the Solana Blockchain by year's end.

## **NFTs**

We plan on having a full spread of NFTs along the way of the project. Each NFT will hold a specific utility, whether it be community based or rewards based each NFT will serve a purpose within our ecosystem. We hope to have enough active community members to make pepe memes that we can reward the creator, as well as mint the memes as NFTs into our PEPE ecosystem, now we're talking about community engagement! Top holders of \$PEPE will receive special NFTs for holding tokens for a certain duration.

## ***Token***

Blockchain - Solana

Contract - CYuXNHURE8cF3rQc1687DZnmsWx9ATNG3mZPFmryu22S

Supply - 1,700,000,000 \$PEPE will ever be minted (will burn to 1B tokens)

- 10% held for future development
- 10% for Liquidity
- 80% for community, giveaways and dex listings
- 120,000,000 PEPE bought and burned
- No tax on transactions
- Tokens can be swapped at raydium.io  
<https://raydium.io/swap?inputCurrency=sol&outputCurrency=CYuXNHURE8cF3rQc1687DZnmsWx9ATNG3mZPFmryu22S&fixed=in> or at
